

Examination and Medical History Forms

Please Keep a Copy

Reverse side of form to be completed by examiner (MD, DO, PA-C or NP) and returned to the applicant. Any blanks will delay processing of the license!

Memorandum to Examining Physician:

You are being asked to examine this applicant for the purpose of obtaining an automobile racing license. This form is a guide and tool for you to determine if the applicant is medically qualified to race. This form concentrates on the organ system and disease processes that may jeopardize the applicant or others while attending a competitive racing event.

Page One (this page) - Instructions for completing the Physical Examination form, and should be read carefully by both the examining physician and the applicant.

Examination is to be completed by a Physician. **Medical History** is to be completed by the applicant.

A. The functional suggested requirements of a driver in a competition automobile are:

- 1. Ability to rapidly operate acceleration, braking, and steering mechanisms/systems.
- 2. Vision: distant vision correctable to 20/40 each eye, ability to distinguish basic colors, and peripheral vision to 70 degrees in the horizontal median for each eye.
- 3. Should have minimal chance of sudden incapacitation from any disease process.
- 4. Ability for rapid mental activity, problem solving, and decision-making.
- 5. Ability to maintain an aerobic level heart rate for more than 20 minutes.

B. The environment this applicant may operate in is:

- 1. Temperature extremes from 0 degrees (F) to 120 degrees (F) for long periods of time.
- 2. Smoke, fumes, vapor, caustic chemicals, and dust.
- 3. Loud noise and vibration.
- 4. Increased potential for exposure to fire.

Special Cases: In a case where consults are needed, the consultant should be made aware of the information in **Section A** and **Section B** of this memorandum.

Requirement of All Applicants*: All applicants must submit a completed APPLICANT'S MEDICAL HISTORY and PHYSICIAN'S EXAM. Similar forms from NASA or full FAA may be acceptable. However, the applicant will be held accountable to the rules, laws, and other parameters, as set forth by the issuing organization or agency.

Renewals:

Applicants that are less than 40 years old must renew their Physical Examination every five years. Applicants that are at least 40 years old must renew their Physical Examination every three years. Applicants that are at least 50 years old must renew their Physical Examination every two years. Applicants that are at least 70 years old must renew their Physical every 12 months.

Note to the examining physician: Please note the "**Renewals**" section of this document (above). Consideration should be given to the length of time between examinations, unless otherwise specified with highlighted notation in the comment section found on the PHYSICIAN'S EXAMINATION page of this document.

Note to Physician and Applicant: Medical Fitness of a Driver-Changes in Medical Condition after approved physical. Refer to GCR 2.3.2.A.3.

1

Examination

To be completed by a MD, DO, PA-C or NP only. Any blanks will delay processing!

Examination shall not be more than six (6) months old upon license application.

There are Four PAGES to this form. Please see "APPLICANT'S MEDICAL HISTORY" and "SCCA Competition License" Physical Examination Instructions." Use the fourth page for any explanations.

Tips on Peripheral Vision Exam:

Peripheral vision exam by confrontation is simple procedure. Position yourself so that your face is directly in front and on the same level with the patient, about 2 feet away. Ask the patient to cover one eye and to look at your eye directly opposite. Close your other eye so that your own visual field is roughly superimposed on that of the patient. Bring a pencil or other small object (light) from behind and from the periphery slowly into the patient's field of vision. Ask the patient to indicate when the object appears. Estimate in degrees the point where the patient sees the object to the point where the patient is looking directly ahead. Test the other eye in the same manner. Lack of adequate or impaired peripheral vision should be given special consideration.

dditional History or Comments:
